## Introduction

In the past couple of years, the idea of greenery indoors and in our innate surroundings has taken off. This is not only because of the beauty that plants bring to our surroundings, but also due to the evidence that there are many health and wellness benefits to incorporating biophilic design into our everyday lives.

---

## The Need For Biophilic Elements

From small house  
plants, to large indoor  
greenwalls, the demand  
for green integrated  
into our spaces is only  
growing.

GrowUp

Introducing plants into  
offices gives employees a  
positive effect of attention,  
creativity, and productivity.

# An Increase in Natural Elements such as Sun Exposure & Plants

RESULT IN...

GrowUp

|

**It was found that  
when there is an  
increased amount of  
natural elements,  
such as sun exposure  
and plants, resulted  
in higher  
organizational  
commitment and job  
satisfaction, as well  
as lower depressed  
moods.**
