# Plant Design

## During the design phase

- » Use this template on paper or in Powerpoint
- » On Paper
  - Print the template
  - Mark out the size of your wall
  - Use colored markers or pencils to create the pattern of plants desired
  - Use the key below the grid to assign a plant to each color
  - Use this design template on site to ensure plants end up in the correct place
- » In Powerpoint
  - Save the file with a new name
  - Delete the unnecessary pots from the grid
  - Select the pots in the pattern desired and change the fill to represent each plant
  - Do the same color coding on the key below the grid and update the plant names
- » Remember
  - Larger plants will block the light from lower plants
  - All plants should have similar watering needs
  - Check out the plant guides on [www.growup.green/resources](http://www.growup.green/resources)
